Setting up the tables

1. Setting up the customer table (17:53)
2. Setting up the stock table (9:09)
3. Setting up the supplier table (4:50)
4. Importing data into the stock and supplier table (4:27)
5. Starting an AutoNumber at 100 in the customer table (7:34)
6. Importing the customer data starting at 100 (1:25)
7. Basic select query – listing all customers (5:41)
8. Sorting your queries (2:30)
9. Setting up the orders table (11:21)
10. Importing dummy data into tblOrders (3:50)
11. Setting up tblOrderedItems (4:21)
12. Joining the five tables (4:43)
13. Setting a drop down box in tblOrderedItems & tblOrders (6:34)

Using queries

14. Searching for outstanding deliveries (4:40)
15. Setting up a parameter query (3:48)
16. Using two parameters and an operator (4:00)
17. Using multiple conditions (2:47)
18. Setting up multi-table queries (3:05)
19. Using calculations in queries (4:34)
20. Working out the VAT (3:39)

21. Producing a re-order query (7:17)
22. Working out the potential profit from stock (4:20)
23. Producing a query to feed an invoice (5:46)
24. Using aggregate functions – example 1 (5:20)
25. Using aggregate functions – example 2 (2:51)
26. Using aggregate functions – example 3 (3:22)
27. Using aggregate functions – example 4 (2:28)
28. Make table query – produce a price list archive (4:20)
29. Update query – update category A goods by 25% (7:30)
30. Using SQL – update all prices at once (6:11)
31. Update the stock table from an invoice using SQL (9:49)
32. Using a delete query to delete old orders (14:47)
33. Introducing macros to run our queries (13:12)

Using forms

34. Create an input form for the customers (3:07)
35. Customising the form (10:43)
36. Adding a combo box (3:51)
37. Adding command buttons (5:32)
38. Making a tabular form (4:35)
39. Conditional formatting on forms (1:45)
40. Forms with sub-forms (8:16)
41. Form for customer orders (6:19)
42. Adding a calculated field to the sub-form (2:51)
43. Producing a sum total in the footer (3:12)

44. Completing the formulas on the main form (8:00)

Reports

45. Simple grouped report (6:33)
46. Setting up a report from multiple tables (19:45)

Front end menus

47. Producing the main menu page (9:54)
48. Completing the menu forms (7:23)
49. Setting the main form to automatically open at start up (1:37)
