

Contents

1. Introduction & Flat file Vs Relational databases

Introducing Access 2007

2. Opening Access for the first time
3. Office menu button
4. Quick access toolbar
5. Tabs and ribbons
6. Using the navigation pane and tabs

The basics

7. Open an existing database & save an older version
8. Enabling macros to work
9. Getting help within Access
10. Understanding tables
11. What are Queries?
12. How do we use forms?
13. Exploring Reports

It's time to create your database

14. A look at the database we will build
15. Designing the tables on paper first
16. Identifying the data types
17. Screen capturing your portfolio evidence

Tables

18. Producing the Customers table
19. Produce the Books table
20. Produce the Loans (link) table
21. Produce the three lookup tables
22. Data types & setting fields to accept data
23. Input masks
24. Setting validation checks
25. Adding another field & manipulating tables

26. Linking the six tables
27. Editing the table joins
28. Adding data & editing the drop-down fields
29. Sorting data in a table
30. Filtering data in a table

Creating and customising forms

31. Look at the types of form you could use
32. Produce the data entry forms
33. Produce a form with sub form for loans
34. Set the properties of a form
35. Arrange the form to your taste
36. Create a form from a blank form
37. Set the tab order & tab stop properties
38. Adding navigation buttons to forms
39. Finding customers by adding a combo box
40. Using a list box on the loans form
41. Filtering a form

Setting up the queries

42. Create a single criteria query to search for books
43. Locating data with multiple criteria And Or Not
44. Using parameter queries
45. Find an occurrence of a word in a field using "Like"
46. Set up a query to find overdue books
47. Perform calculations in a query
48. Produce a form linked to a multiple table query

Using reports

49. Produce a report showing the overdue books
50. Create a report linked to a query
51. Customising reports
52. Conditional formatting on forms & reports

Switchboards

53. Create the switchboard automatically
54. Create a switchboard manually

Mail merging

55. Produce a mail merged letter in word
56. Produce a mail merged late books letter from Access
57. Mail merged labels on a report in Access
58. Customise your own size of label

General topics

59. Password protect your database
60. Use find and replace to update information
